

15. (Amended) A cap assembly, comprising:

a container having a plurality of sides and an opening disposed on a top portion of said container, said opening disposed at the top of a first one of said plurality of side walls, said opening covered by a cap positionable in an opened and closed position; and

an extendable straw, said straw having upper and lower portions, where said lower portion is coupled with said first side wall, and wherein said upper portion is [disposed in] coupled with an inner side of said [opening] cap so that when said cap is in an opened position, said straw is [extended through] available at said opening for use.

16. (Amended) A cap assembly as set forth in claim [21] 20, said straw further comprising pleats disposed between said upper portion of said straw located on said cap and said second lower portion disposed along said first side wall so that said straw can bend over a base of said scored finger portion.

Please add the following new claim:

--21. (New) A cap assembly as set forth in claim 20 wherein a top opening of said straw is disposed co-planar with a top side of said scored finger portion.--
